

EXPLANATIONS AND METHODS

Explanations covering several characteristics

- (a) Pod: Observations on the pod should be made at fresh harvest maturity
- (b) Seed: All observations on the seed should be made at the mature dry stage on the harvest material

Ad. 10: Terminal leaflet: shape

1
triangular

2
triangular to circular

3
circular

4
circular to quadrangular

5
quadrangular

Ad. 11: Terminal leaflet: apex

3
short acuminate

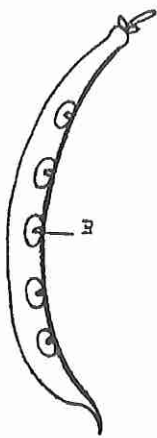

5
medium acuminate

7
long acuminate

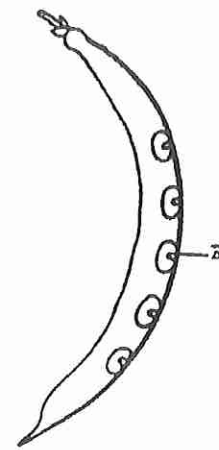

Ad. 19: Pod: shape of curvature

1
concave

2
s-shaped

3
convex

Ad. 20: Pod: shape of distal part (excluding beak)

1
pointed

2
pointed to truncate

3
truncate

Ad. 23: Pod: curvature of beak

3
weak

5
medium

7
strong

Ad. 26: Seed: shape of median longitudinal section

1
narrow elliptic

2
elliptic

3
broad elliptic

4
kidney shaped

Ad. 27: Seed: shape of median cross-section

1
narrow elliptic

2
elliptic

3
circular

Ad. 31: Seed: distribution of predominant secondary colour

1
spotted

2
mottled
